

An outline highlighting the troubling, tangled web of inter-connected relationships among study authors, reviewers, journal editors and commenters of some of the studies most frequently referenced by anti-fluoridation activists. Initial associations were highlighted by Ken Perrott.

<https://openparachute.wordpress.com/2020/04/10/anti-fluoridation-propaganda-now-relies-on-only-four-studies-6-incestuous-relationship-of-these-studies/>

The authors, reviewers, editors and commenters of these studies work within a “[Filter Bubble](#)” that needs to be exposed and broken to prevent the ability of dubious studies to be published and promoted – unfortunately the bubble extends to include members of the public, most of whom are not qualified to personally evaluate study limitations.

Authors and co-authors, Reviewers, Editors and Commenters of the 28 anti-F neurological and other related publications listed below

The [four studies singled out by Connett](#) & referenced in Ken Perrott's article above are **red-highlighted** in the list of studies.

Those who have contributed to **five** or more of the 27 studies are **highlighted**.
